

Vehicle Parking and Charging Stations

Vehicle parking and charging stations are integrated facilities designed to accommodate electric vehicles (EVs) while providing the necessary electrical energy to recharge their batteries. With the rapid growth of EV adoption worldwide, such stations have become essential infrastructure in cities, commercial complexes, residential areas, and highways.

In addition to charging capabilities, a well-designed sheltered parking space ensures safety, easy accessibility, and protection from weather conditions for all vehicles. The well-maintained facility enhances user convenience and supports the comfort of learners, staff, and visitors, contributing to a smooth and efficient campus experience.

1. Purpose

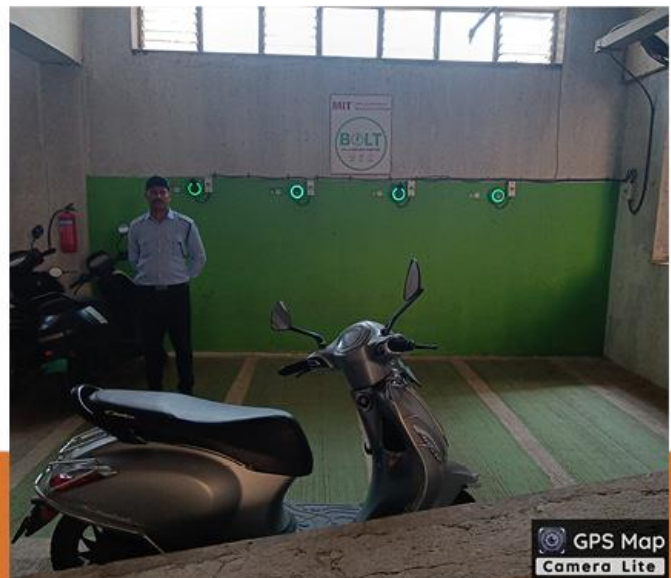

- Provide safe and organized parking for vehicles.
- Enable convenient charging for electric vehicles during short or long stays.
- Support the transition to sustainable and low-emission transportation.
